

## ***Family Policy Alliance ...***

of Idaho, a pro-family ministry, applauds Gov. Brad Little for signing the Heartbeat Bill (H366). The bill passed both legislative chambers with veto-proof super-majorities earlier this month.

The Fetal Heartbeat Pre-born Child Protection Act, would protect the right to life of pre-born children with a detectable heartbeat. Doctors can easily find a fetal heartbeat as early as six weeks of gestational age through commonly available medical technologies like ultrasonography.

The medical community has found that 95 percent of preborn children with a fetal heartbeat detected early in the pregnancy will survive to term. Obstetricians consider fetal heart activity to be an important milestone in prenatal development and routinely run tests to determine heart rate as an important indicator of a pre-born child's health.

"Gov. Brad Little showed that Idaho recognizes the value of every pre-born life when he signed the Heartbeat Bill this morning. We are proud that Idaho can be added to the list of pro-life states leading the charge in offering legal protection for our youngest and most defenseless residents. The action taken today by Gov. Brad Little will ultimately save thousands of precious lives.

"This Heartbeat Bill is constitutionally, scientifically, and morally sound. And thanks to modern medical technology, every new parent now knows the excitement of first hearing their son or daughter's heartbeat during early prenatal check-ups. This explains why a reputable national poll found that nearly 70 percent of Americans – including 55 percent of Democrats – support this life-affirming legislation. Preborn babies with beating hearts deserve the same constitutional right to life accorded to any other living person."

## ***Spurgeon's Proverbs ...***

Humble we must be if to heaven we go: high is its roof, but yet its gate is quite low.

I cannot swallow the sea for the sake of the fish.

"I don't care" is a deadly snare.

I saw an honest lawyer and a white crow.

Idle bodies are generally busybodies.

Idle brains are addles brains.

Idle people are dead people that you can't bury.

Idle young, needy old.

## ***Baptists are a self-governing ...***

self-propagating and self supporting people, when they follow the Bible. Where subsidies thrive, self-support dies. Where enlistment thrives, missions die. Where handed-down budgets thrive, local self government dies. Where overhead expenses multiply, contributions dwindle. Where [humanistic] education is magnified the gospel of grace, which is the child of humility, is unknown. Where standardization is supreme, the Lord Jesus is dethroned. Where [humanistic] education is the standard, the head is the main thing, mind is master, faith is only a form of intellectual assent and heresies prosper. Back to the Bible should be the watch word of Baptists everywhere.

– H. Boyce Taylor (1870-1932)

## ***Because of Mount St. Helen's...***

eruption, scientists know that sedimentary rock layers and steep-walled canyons can form in only hours. Fast layering, fast hardening, and fast canyon carving from Mount St. Helens make the world's layers, rocks, and canyons look young. One doesn't need vast time to explain these Earth features – just vast water. Of course, Scripture told us all along about this water, saying, "For this they willingly are ignorant of, that by the word of God the heavens were of old, and the earth standing out of the water and in the water: Whereby the world that then was, being overflowed with water, perished" (2 Peter 3:5-6).
